DATE:	1/7/09	ATTEROTECH 
WWW.ATTEROTECH.COM		

Pro audio for the whole family.

Large commercial projects have used CobraNet® for years to reduce cost and improve system performance. Now we offer the same pro-audio capability for residential applications with product knowhow to transform your ordinary analog systems into fully digital video and audio juggernaut that saves material and labor while improving system performance.

Whether you are connecting a new source (iPod, MP3 player, satellite radio, or some yet-to-be-dreamed audio/video source) to your existing whole house AV system or plotting your next generation whole-house audio/video distribution system, we can get you there. Here are some of our areas of expertise:

AUDIO/VIDEO SOURCES	COBRANET® AUDIO/VIDEO DISTRIBUTION SYSTEMS	EMBEDDED NETWORKING
<ul style="list-style-type: none"> • iPod control • Satellite radio control • Wireless AV remote control • Internet radio streaming & control • Premium internet services (<i>Pandora, Rhapsody, etc.</i>) streaming & control • AM/FM/HD/DAB tuner control 	<ul style="list-style-type: none"> • Low-latency SD/HD H.264/AAC Audio/Video routing over CobraNet • Multiple system configurations to meet your needs • Centralized system control • Distributed system control 	<ul style="list-style-type: none"> • TCP/IP • SNMP • UDP • UPnP
